

FINDINGS

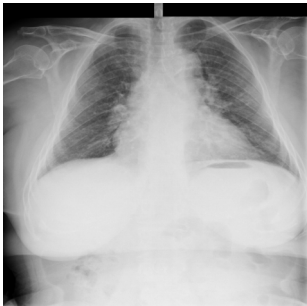

No TB regions detected.

IMPRESSION

No radiographic evidence of tuberculosis; image classified as healthy.

RECOMMENDATION

No referral indicated; routine screening.

FINDINGS

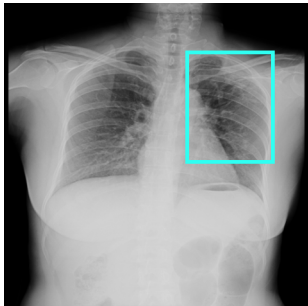

No TB regions detected.

IMPRESSION

No tuberculosis indicated; image classified as a non-TB abnormality.

RECOMMENDATION

No TB referral; manage per other clinical findings.

FINDINGS

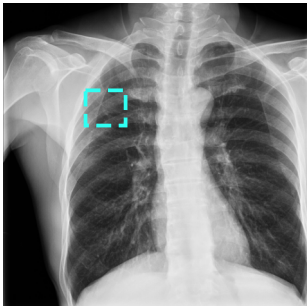

1. Active TB, high confidence, middle left zone.

IMPRESSION

Findings consistent with active pulmonary tuberculosis.

RECOMMENDATION

Refer for bacteriological confirmation (sputum Xpert MTB/RIF).

FINDINGS

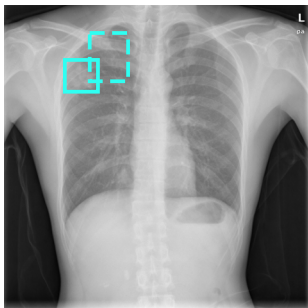

1. Latent TB, high confidence, middle central zone.

IMPRESSION

Findings consistent with latent or old tuberculosis.

RECOMMENDATION

Refer for clinical correlation and latent-TB evaluation.

FINDINGS

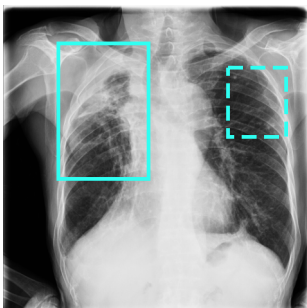

1. Active TB, high confidence, upper right zone.
2. Latent TB, high confidence, upper central zone.

IMPRESSION

Active pulmonary tuberculosis, with an additional region of latent or old TB.

RECOMMENDATION

Refer for bacteriological confirmation (sputum Xpert MTB/RIF).

FINDINGS

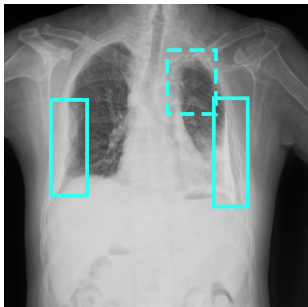

1. Active TB, high confidence, middle right zone.
2. Latent TB, high confidence, upper left zone.

IMPRESSION

Active pulmonary tuberculosis, with an additional region of latent or old TB.

RECOMMENDATION

Refer for bacteriological confirmation (sputum Xpert MTB/RIF).

FINDINGS

1. Latent TB, high confidence, upper central zone.
2. Active TB, high confidence, middle left zone.
3. Active TB, high confidence, middle right zone.

IMPRESSION

Active pulmonary tuberculosis, with an additional region of latent or old TB.

RECOMMENDATION

Refer for bacteriological confirmation (sputum Xpert MTB/RIF).

FINDINGS

1. Active TB, high confidence, upper right zone.
2. Active TB, high confidence, upper left zone.
3. Active TB, high confidence, middle left zone.
4. Active TB, high confidence, middle right zone.

IMPRESSION

Findings consistent with active pulmonary tuberculosis.

RECOMMENDATION

Refer for bacteriological confirmation (sputum Xpert MTB/RIF).
